

# IBM Connections Monitoring

## VitalSigns Monitoring Portfolio

Microsoft On-Premise Exchange   SfB   SharePoint	Switches & Devices Standard (ping) & Advanced (SNMP)
IBM Connections Domino   WebSphere	On-Premise Business Apps
Microsoft Office365 Exchange   SfB   SharePoint	Cloud Business Apps

## IBM Connections Monitoring with VitalSigns

IBM's Flagship product in the Social Network Software Category developed by IBM to provide online social networking tools for people associated with a company.

The IBM Connections components are built on a set of services according to the service oriented architecture concept. These components take the form of J2EE applications which are hosted on IBM WebSphere Application Server. This design allows the components to be hosted independently of each other and to support **very large scale** deployments. This can be accomplished using multiple instances of Connections and VitalSigns will allow you to compare and contrast these instances of Connections.

## VitalSigns for Domino Monitoring Focus

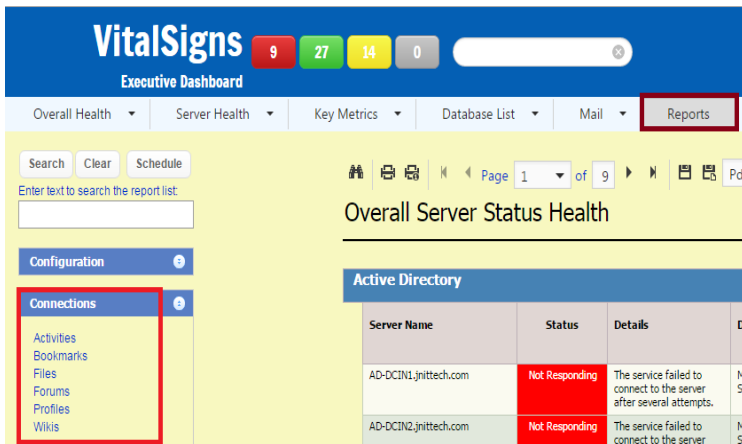

- User Adoption
- Reports
- Alerts
- Overall Health Assessment
- Availability Status
- Optimization Opportunities
- Financial Reports
- Trend Analytics

# VitalSigns for IBM Connections Monitoring Advantages

- Overall Health
- Trend Analysis
- Adoption Metrics
- Daily Activities
- User Metrics on Blogs, Wiki's, Forums, Profiles, Bookmarks, Activities and Files

## IBM Connections Reports

Reports are focused on a specific module and allow you to pick a date range, and allow you to specify which instance of Connections you want on the report.

## About Us

VitalSigns is the premier monitoring solution from RPR Wyatt, a USA based high-tech IT organization. For over fifteen years RPR Wyatt has created administration tools designed to enhance organizational collaboration, improve user experience, empower administrators, and lower operational IT costs. RPR Wyatt is a Microsoft and IBM Advanced Business Partner.
